Foodpolis stands tall with the Korean Food Industry!

As the only one-stop support organization for food companies in Korea, we drive industry growth by strengthening the global competitiveness of the food industry.

The Food Industry Promotional Agency of Korea (Foodpolis)

Foodpolis is a specialized organization dedicated to advancing the food industry and creating future value. We provide a business-friendly environment through tailored consulting in technology, production support, human resources, startups, marketing, and exports, leveraging our business support facilities. Foodpolis is committed to being a reliable partner for the success of Korean food companies.

National Food Cluster

This is Korea's first food specialized national industrial complex, operated by the government, with a focus on technological innovation in the agriculture and food sectors and the development of overseas market exports. This food cluster aims for a unique form of development, separating it from traditional industrial complexes. Companies and organizations within the food industry come together to create collaborative synergies through mutual networks, promoting joint growth. Watch the growth of food companies that will lead the future of the Korean food industry.
